FAQS

— How does your automatic token creation service work?

Our service simplifies the token creation process. Simply choose a name, symbol, and set fees, and we'll generate smart contracts across various networks, including Ethereum, Binance Smart Chain, Polygon, and more.

— Which blockchain networks are supported?

Explore the extensive list of supported networks, including Ethereum, Binance Smart Chain, Polygon, and more, ensuring widespread accessibility for your token.

+ How long does it take to generate the smart contracts and deploy the token?

+ What information is required to create Token?
